DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35
U.S.C. 102 that form the basis for the rejections under this section made in this
Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Giba et al. (US 5876373; hereafter Giba).

The cited patent discloses an elongate body, a distal section being deflectable upon application of an external force, a lumen to deliver therapeutic agents, and curvature-adjustment mechanism.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-44 are rejected under 35 U.S.C. 103(a) as being unpatentable over Giba et al. (US 5876373; hereafter Giba) in view of Delarama et al. (US 5881782; hereafter Delarama) or Lundquist (US 5454787), and in further view of Jacobsen et al. (US 5833632; hereafter Jacobsen).

Application/Control Number: 10/534,362

Art Unit: 3763

The Giba Patent does not disclose (1) an elongate stiffener that is slidable longitudinally relative to the body and a fulcrum spaced a distance from the distal end and (2) a distal section comprising a slotted tube. However, these enhancements would have been considered conventional modifications at the time the invention was made in view of the teachings of Delarama, Lundquist, and Jacobsen.

In figure 2a, the Jacobsen patent shows an elongate stiffener that is slidable longitudinally relative to the body. Delarama shows in figures 5 and 7, a catheter having a distal section comprising of a slotted tube. Similarly, Lundquist demonstrates the conventionality of designing a catheter having a distal section comprising of slotted tube.

Based on the above observations, for a person of ordinary skill in the art, modifying the Giba catheter with an elongate stiffener, as taught by Jacobsen, and with a distal section comprising of a slotted tube, as taught by Delarama and Lundquist, would have been considered obvious in view of the proven conventionality of these enhancements, and moreover, because the use of a stiffener would have improved the handling of the catheter during surgical procedures. Additionally, the use of a slotted tube design would have provided a catheter with added flexibility at the distal end.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel A. Mendez whose telephone number is 571-272-4962. The examiner can normally be reached on 0730-1800 hrs.

Application/Control Number: 10/534,362

Art Unit: 3763

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Nicholas D. Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
